## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

I. Claims 3 and 18, drawn to a semiconductor manufacturing apparatus having an open/close sensor and method of using.

II. Claims 4-7 and 19-22, drawn to a semiconductor manufacturing apparatus having a safety sensor for oxygen or ozone and method of using.

III. Claims 8 and 23, drawn to a semiconductor manufacturing apparatus having a measuring means for measuring the concentration of a predetermined gas component and method of using.

IV. Claims 9 and 24, drawn to a semiconductor manufacturing apparatus having a control console for entering the decision of start of maintenance and method of using.

V. Claims 10 and 25, drawn to a semiconductor manufacturing apparatus having a safety sensor and cover locking mechanism responsive to the safety sensor and method of using.

VI. Claims 11-13, 26-28, drawn to a semiconductor manufacturing apparatus having a plurality of prescribed areas with separate gas supply units and separate maintenance decision means and separate supply control means, and method of using.

VII. Claim 29, drawn to a semiconductor manufacturing plant having plural semiconductor manufacturing apparatus.

VIII. Claims 14, 15, 30-33 drawn to a computer-networked semiconductor manufacturing apparatus, plant, and method of using.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 2, 16, and 17 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
